

Whidbey Island Master Class

A Special Five Day Advanced Glass Workshop with Richard La Londe at his Studio

September 28 - October 2, 2012

Friday, Saturday, Sunday, Monday, Tuesday 9:30 am – 5:00 pm

This is an advanced workshop and you should be proficient in glass cutting, glass fusing, and also have attended one of my workshops, where you learned the “liquid glass line” technique. This class is limited to 6 and 6 participants are needed for the class to occur.

Make larger fused glass pieces. Take your art to a professional level!

Participants in this Master Class will design and make a 20” x 20” wall piece with an aluminum backing plate - ready to hang on your wall. You will also fabricate a “La Londe-style” wavy stainless steel mold. We will work in the hot shop of Island Glass Studio with Rob Adamson where you will decorate and hand-roll sheet glass - one of these sheets will then be slumped into your metal mold. We will watch and learn from Michael Stadler who will photograph our glass pieces and then we will pack our glass art and metal mold to safely ship home.

Richard La Londe’s studio is located on beautiful Whidbey Island about 1½ hours including the short ferry ride, from downtown Seattle, Washington. A Motel or Bed & Breakfasts are available on the Island. This is an opportunity to study and interact with a pioneer in glass fusing and author of *Richard La Londe: Fused Glass Art and Technique*, and *Richard La Londe & Friends - Book II*, in his own studio.

Workshop fee \$850 (includes 3 lunches at the studio)

Materials fee \$200

Hot Shop fee \$150

Due to the limited class size and advanced techniques involved, your enrollment in this workshop will be determined through an interview with Richard. Then a \$600 deposit is required to register and the balance of \$600 is due 30 days before the class starts, or you can pay in full at the time of registration, **total workshop cost \$1200.**
